

To: Beasley Power Equipment

As a professional landscaper who does more install and design than actual mowing, the customers I do mow for want a top quality job. So when I wanted a new mower, I needed the highest quality mower at the most affordable price, since it would be used on a limited scale. So I chose the Bad Boy 54" Elite Series 2T with the 747cc Kohler engine. Also when I purchased it, upgraded the mower with a rear cargo basket, canopy roof, and accelerator aluminum side mount leaf and grass catcher. I have been very pleased with my purchase. This mower stripes a lawn as good as any mower I have seen, and the leaf/grass catcher works terrific. All of my customers have loved the look of their lawns since I switched to the Bad Boy mower. I would highly recommend any of the Bad Boy mowers to homeowners or landscape professionals looking for a top quality machine at a fair price.
